

LIGHTING  
CARE GUIDE

Heathfield&Co

#### LIGHTING CARE GUIDE

# General Care

To preserve your Heathfield & Co lighting, we recommend regular and mindful maintenance. Each of our pieces is handcrafted with exceptional attention to detail, and caring for them accordingly will ensure they remain as striking as the day they were made.

Always begin by turning off the power supply and allowing all components to fully cool. Using a clean, dry microfiber cloth, gently wipe down the lamp, base and fittings to remove any surface dust or debris. Avoid abrasive materials and chemical cleaners, as these may damage the handcrafted finishes. Please refer to the product specification sheet for any material specific cleaning instructions.

## LIGHTING CARE GUIDE

# Light Bulbs & Lampshades

Gently dust the bulbs with a soft, dry cloth to ensure optimal brightness and clarity.

Carefully remove the lampshade from the base, taking care to handle it delicately to avoid creasing, denting or marking the material. Use a clean, dry microfiber cloth to lightly dust both the interior and exterior surfaces. We strongly advise against using any liquid-based cleaners on fabric shades, as this may cause watermarks or colour transfer.

LIGHTING CARE GUIDE

## Safety Checks

We recommend regular inspection of bulbs, electrical components and cables to ensure they remain in excellent working condition, and free from damage or wear.

If you have any questions about caring for your lighting or need further advice, we're always happy to help.
